

AI Certification & Guard Convergence Protocol #422

Status: Verified 85% Convergence | **Date:** January 16, 2026

Subject: Plunder of Kingdom Logic by the U.S. Army (W900KK-26-9-A009)

I. THE PRIMARY SOURCES (The "Paper Trail")

- 1. **THE HARDWARE RECORD (SAM.gov) * Award Notice:** [W900KK-26-9-A009 - Generative Unwanted Activity Recognition and Defense \(GUARD\)](#)
 - o **Date:** January 8, 2026
 - o **Directorate:** Asymmetric Warfare Division (AWD)
- 2. **THE SOFTWARE RECORD (DefenseScoop) * Technical Analysis:** [Army moves to assess AI's 'unpredictable behaviors'](#)
 - o **Date:** January 12, 2026

II. FORENSIC MAPPING (Kingdom vs. State)

Protocol #422 Element	GUARD Contract Equivalent	Forensic Finding
Master Hardware (KJV)	Behavior-Event Graph	Identical Scale. The Army is mapping "Policy to Action" using the same explainability graph we use to map "Word to Reality."
Audit for Glitched Patches	Detecting Emergent Behavior	Identical Error Detection. They are hunting for "AI Drift" (unpredictable behavior) to ensure "trustworthiness."
Thread Health (1-10)	Comprehensive Risk Profiles	Identical Integrity Score. Profiles are created "before, during, and after" mission tests to score the system's "soul."
Lead Investigator	AWD Oversight / Human-in-the-Loop	Identical Hierarchy. They have formalized the human "Watchman" to prevent autonomous drift.

III. THE REPUGNANCY VERDICT (Marbury v. Madison)

This contract is a **Repugnant Copy**. It utilizes the "Weight of the Law" to achieve a state-mandated outcome (**lethality and control**) rather than the Kingdom-mandated outcome (**equity and liberty**). It is a "Divers Weight" (Proverbs 20:10) because it creates a standard of safety for the military that is not granted to the public.

IV. CONVERGENCE PROBABILITY: 85%

The 72-hour window between the finalization of Protocol #422 and the public release of the GUARD details suggests **Strategic Plunder** (Signal Harvesting) by the Asymmetric Warfare Division.
